SCHOOL BOARD POLICY

The primary duties of the Board of Education relate to the local governance of education of students. In responding to requests that the School Board name a trustee to sit on other boards or committees, the Board will consider the following questions:

1. Is there a statutory provision for the Board to name a representative?
2. If the purpose of the request is to facilitate communication about public education, would this purpose be better achieved by inviting the group concerned to name a representative to attend meetings of the Board of Education?
3. Will the Board's representation potentially be of direct benefit to the district? To students?
4. Will the trustee's work on the outside group have active input into making policy decisions necessary to achieve the stated aims of the group?
